News:

February is Heart Month

During the month of February, Americans see the human heart as the symbol of love.

February is American Heart Month, a time to show yourself the love. Learn about your risks for heart disease and stroke and stay "heart healthy" for yourself and your loved ones.

Cardiovascular disease (CVD)—including heart disease, stroke, and high blood pressure—is the number 1 killer of women and men in the United States. It is a leading cause of disability, preventing Americans from working and enjoying family activities. CVD costs the United States over \$300 billion each year, including the cost of health care services, medications, and lost productivity.

Electronic Logging Device (ELD) Regulation Summary:

Introduction

On December 10, 2015, FMCSA announced its final rule requiring the adoption and use of electronic logging devices (ELDs) by all drivers currently required to complete paper records of duty status (logs). In the July 2012 highway reauthorization law known as MAP-21, Congress required that FMCSA mandate the use of ELDs. The following is a summary of the final rule's main points.

Device Adoption Deadline Date

The rule requires fleets and drivers required to complete paper logs to adopt and use compliant ELDs by December 2017, unless they are currently using automatic on-board recording devices that are grandfathered (see below).

Grandfathering of Existing Equipment

FMCSA will allow fleets and drivers using "ELD-like" devices meeting the current standards for Automatic On-Board Recording

the 2016**

Devices (see 49 CFR 395.15) to continue to use such devices until December 2019, two years after the final deadline for adoption of ELDs. If these devices can be modified to meet the ELD specifications (e.g., with a software upgrade) they may continue to be used after December 2019.

Limited Exceptions

The final rule allows limited exceptions to the ELD mandate, including:

- Drivers who use paper logs for not more than 8 days during any 30 day period;
- Drivers who conduct driveaway-towaway operations, where the vehicle is the product being delivered;
- Drivers of vehicles manufactured before model year 2000 (due to vehicle connectivity concerns; this is a change from the proposed rule);
- Drivers who operate using the logbook timecard exception (i.e. short-haul 100-air mile drivers)

Short Haul Drivers

Drivers who are not required to complete logs because they meet one of the short haul exemptions in section 395.1 (e) of the Federal Motor Carrier Safety Regulations are not required to use ELDs. FMCSA recognizes that these drivers occasionally don't meet the conditions of these exemptions. In those instances, drivers are required to keep a paper log. Drivers who find themselves in these circumstances more than 8 days in any 30-day period are required to use ELDs.

Location Monitoring

ELDs are required to record vehicle location at every change of duty status and at a minimum of 60-minute intervals. To ensure against harassment and protect driver privacy, the devices will record location during on-duty time at a precision of approximately one mile, and during off-duty time of within ten miles (i.e., will not record exact location but generally where the vehicle is located when used for personal conveyance). Note: Fleets may employ devices that record location more precisely; FMCSA has imposed the one and ten-mile precision limits on information that is reported to enforcement officials when electronic logs are being verified.

Supporting Documents

Because ELDs effectively negate the need for supporting documents

Idealease / NPTC Safety Seminar

Idealease and the National Private Truck Council NPTC will again be hosting safety seminars in 2016. The one day seminar this year will focus on the new Electronic Logging Device (ELD) regulation, basic safety and compliance, regulation changes and CSA. In addition, this year attendees will receive the mandatory two hour Drug and Alcohol supervisor training as part of the seminar. The seminars will be provided to all Idealease customers, potential customers and NPTC members at no charge. The seminar provides important information applicable for both the novice and experienced transportation professionals.

2016 Idealease Safety Seminar Schedule:

March 17	Memphis, TN
March 23	Santa Rosa, CA
March 29	Shreveport, LA
March 30	Dallas, TX
March 30	Atlanta, GA
April 12	Wausau, WI
April 14	Madison, WI
April 14	Lodi, CA
April 19	Fort Myers, FL
April 20	Tampa, FL
April 21	Orlando, FL
April 26	Baltimore, MD
April 27	Harrisburg, PA
April 28	New Windsor, NY
April 28	Cedar Rapids, IA
May 3	Kansas City, MO

to verify *driving* time, FMCSA has implemented new document retention requirements to verify on-duty, not driving time. The final rule requires fleets to retain up to eight supporting documents from several categories (see below) per driver for each 24-hour period:

- Bills of lading, itineraries, schedules or equivalent documents indicating the origin and destination of a trip;
- Dispatch records, trip records, or equivalent documents;
- Expense receipts related to on-duty not driving time;
- Text messages, email messages, instant messages, or other electronic mobile communications transmitted through a fleet management system;
- Payroll records, settlement sheets, or other documents reflecting driver payments.

In order to qualify as a supporting document, a document must contain the following content: driver identification, date, vehicle location, and time. If the motor carrier has more than eight documents containing these data elements, they must retain the supporting documents nearest the beginning and the end of the driver's shift. Drivers are required to submit such documents within 13 days of receipt and produce those in their possession to law enforcement upon request. Fleets are required to maintain them in a manner which would facilitate their being easily matched to the logs.

Data Transfer

ELDs must be able to transfer data electronically via either a) a "telematics" approach capable of wireless Web service; or B) a "local" method capable of Bluetooth and USB 2.0 transfer. In all circumstances, drivers must be able to show a roadside inspection officer a graph-grid of his/her hours of service compliance, either on the ELD's display or on a hardcopy paper printout.

Certification

Manufacturers are required to test and certify to FMCSA that their devices meet the new standards. FMCSA will create a public (i.e. Internet) registry of compliant devices and conduct tests to verify manufacturers' claims.

Harassment

The final rule includes several provisions to guard against harassment of drivers. Specifically, the rule prohibits motor carriers from using information from ELDs to pressure drivers into violating regulations. The final rule also requires ELDs to either automatically mute or allow a driver to turn off or mute the volume on the ELD (or the fleet management system with integrated ELD functionality) when they have logged into the sleeper berth status in the ELD.

May 3	Lexington, KY
May 5	Salt Lake City, UT
May 5	Aurora, CO
May 10	Everette, WA
May 12	Moncton, NB
June 7	Springfield, IL
June 23	San Leandro, CA
September 20	Lafayette, IN
September 22	Santa Barbara, CA
October 4	Green Bay, WI
October 4	Erie, PA
October 5	Butler, PA

FMCSA also places restrictions on location precision (see above) and establishes a process for drivers to file harassment complaints related to ELDs.

ELD Malfunctions

In the event that an ELD malfunctions, the driver is required to immediately begin completing a paper log and to reconstruct logs for each of the past 7 days, unless the driver already possesses the records or the records are retrievable from the ELD. ELDs must be repaired within 8 days, subject to an FMCSA-approved extension.

Personal Conveyance and Yard Moves

Authorized use of a commercial motor vehicle (CMV) for personal conveyance will not be recorded as on-duty driving, but rather off-duty time. Similarly, authorized use of a CMV in a closed facility with restricted access (e.g., a yard) will be recorded as on-duty not driving time.

Driver Edits

Drivers will be able to make edits and annotations to their electronic logs, however the edits will not overwrite or erase the original record, which will be retained. Employers will be able to request edits or annotations, but those must be approved by the driver.

Interoperability of Devices and Systems

All ELDs must be capable of exporting data in a standard file format to facilitate importing by other systems. However, devices and systems are not required to be capable of importing these records. (The above information provided by the ATA)

Registration is now open online for the 2016 Idealease/NPTC Safety Seminar!

Idealease and the National Private Truck Council NPTC will again be hosting safety seminars in 2016. The one day seminar this year will focus on the new Electronic Logging Device (ELD) regulation, basic safety and compliance, regulation changes and CSA. In addition, this year attendees will receive the mandatory two hour Drug and Alcohol supervisor training as part of the seminar. The seminars and will be provided to all Idealease customers, potential customers and NPTC members at no charge. The seminar provides important information applicable for both the novice and experienced transportation professionals.
