

Dedicated Facility

When Truck Maintenance is not your Core Business, Count on Idealease!

Do you have the scale to run your own maintenance shop cost effectively?

Our Dedicated Facility program lets you leverage our maintenance expertise at your facility and outsource the management of fleet maintenance. Idealease handles Preventive Maintenance, Predictable Maintenance, brakes, tires, inspections and more to improve vehicle and reduce cost.

We Make it Easy!

On-Site Management

Idealease places a service supervisor at your location. They manage the day-to-day relationship between your company and Idealease. The supervisor sweats the maintenance and repair details for your fleet so you don't have to.

Skilled Technicians

Idealease employs highly skilled, manufacturer-certified technicians who use the best practices in maintenance to keep your equipment running at peak performance. All major repairs are typically supported by the International® Truck dealership affiliated with the Idealease location.

Staffing

We hire the optimum number of service technicians needed to support your fleet, and we provide them with industry-leading training and opportunities for career advancement.

Tools and Technology

Idealease uses state-of-the-art diagnostics and tools to service your vehicles. We typically purchase your shop tools and equipment—and when appropriate, your parts inventory.

Effective Communication

The Idealease team builds a strong relationship with your fleet department and establishes effective communications on vehicle performance with your drivers and company management.

What are you waiting for?

Choose Idealease!
