**Q: I like the driver grades! Can you give me a few quick tips on how to use the Excel document to identify my best Key Performance Indicator (KPI) behavior opportunities in my fleet to improve grades?**

**A:** Fleet managers don't always have time to ride alongside their drivers. The grading system allows managers to quickly identify how drivers are performing. Driver grades are based on KPI scores. In the Excel document you'll find each KPI score that make up the grade that allows you to quickly recognize where your fleet has the biggest opportunities for change. Idealease Business Intelligence does the analytics, so you don't have to.
