HOW TO AVOID BRAKE EVENTS

Idealease revolutionizes fleet operations with ELEVATE®, our proprietary Driver Performance System that improves driver safety and saves fleets millions of dollars in annual operating costs.

Sign up for the ELEVATE® Question/Tip of the Week and receive short, actionable, and easy-to-use information to help your drivers operate their vehicles more safely while reducing fuel consumption, idle time, wear and tear on equipment, maintenance costs, vehicle downtime, and more.

If you have a question or a topic you would like covered in a future ELEVATE Question/Tip of the Week, email ELEVATE@Idealease.com (<mailto:ELEVATE@Idealease.com>).

Find a complete list of ELEVATE topics below.

Q: have a driver that consistently has braking events, but he has a good driving record and doesn't understand why these events are happening. Do you have any tips?

A: Having a good driving record is great, but that doesn't always mean the driver is the safest in your fleet. Perhaps he or she is the most fortunate.

Braking events can be an indicator of aggressive, risky, or inattentive driver behavior. The most common cause is following too closely. Many drivers are under delivery time windows and pressures or Hours of Service limitations. Although they may feel rushed, following too closely does not translate to saving time. Try using this as a coaching moment on the proper practice of maintaining an optimal following distance.
