## NICE WEATHER IMPACTING BRAKE AND CORNER EVENTS

Idealease revolutionizes fleet operations with ELEVATE®, our proprietary Driver Performance System that improves driver safety and saves fleets millions of dollars in annual operating costs.

Sign up for the ELEVATE® Question/Tip of the Week and receive short, actionable, and easy-to-use information to help your drivers operate their vehicles more safely while reducing fuel consumption, idle time, wear and tear on equipment, maintenance costs, vehicle downtime, and more.

If you have a question or a topic you would like covered in a future ELEVATE Question/Tip of the Week, email [ELEVATE@Idealease.com](mailto:ELEVATE@Idealease.com).

Find a complete list of ELEVATE topics below.

### **Q: Brake and corner events increased a bit in March. Why the sudden spike?**

**A:** That's a great observation. In fact, both events increased considerably for most ELEVATE customers. Only a few of our customers improved their corner events in March.

When better weather comes along, there are fewer weather-related road dangers, such as ice or snow, that remind drivers to be more careful on curves and exit ramps. This is why you see a spike in corner events.

The same occurs with brake events; the driver's concern for leaving extra space between themselves and the vehicle ahead of them subsides when roads are clear.

As weather warms up, it's a great time to remind your drivers to remain vigilant in their safe driving habits; following other vehicles at an appropriate distance and monitoring appropriate speeds on winding roads and exit ramps are prime examples of vigilance and safe driving habits you should expect (and positively reinforce) from your drivers.
