Q: When is CVSA's Roadcheck, and what are they going to focus on?

A: This year the annual Commercial Vehicle Safety Alliance (CVSA) Roadcheck is scheduled to take place May 17th -19th. The CVSA will place an emphasis on wheel ends. Wheel end components support the heavy loads carried by commercial motor vehicles, maintain stability and control, and are critical for braking. Violations involving wheel end components historically account for about one quarter of the vehicle out-of-service violations discovered during Roadchecks. Past Roadcheck data routinely identified wheel end components as a top 10 vehicle violation.

Prepare Drivers for Roadcheck

Inspections are conducted every day of the year across North America, but drivers should realize that the risk of being stopped will increase during the Roadcheck.
