

BREAKING THE GRADES DOWN

Q: I like the driver grades! Can you give me some quick tips on how to use the Excel doc to identify my best Key Performance Indicator (KPI) behavior opportunities in my fleet to improve grades?

A: Fleet managers don't always have the time to go out and ride along with their drivers. The grading system allows managers to quickly identify how drivers are performing. Driver grades are based on KPI scores. In the Excel doc you'll find each KPI score that make up the grade allowing you to quickly recognize where your fleet has the biggest opportunities for change. Idealease Business Intelligence does the analytics, so you don't have to.
